011-43095694

ABOUT SUMMIT

India's Healthcare system is unique, dynamic, complex and multifaceted, involving both the government and private sector, catering to the health needs of over 1.4 billion population.

Although India has shown remarkable progress in healthcare and is becoming a preferred medical tourism destination, management of modern hospitals has become very challenging because of many factors like-

- **Rapidly evolving advances in medical technology**
- **Increasing awareness of healthcare needs and heightened patient expectations**
- **Promulgation of new laws like CEA, CPA, RTI Act, etc.**
- **Financial sustainability in the backdrop of inadequate funds from Govt schemes**
- **Shortage of trained human resources due to attrition and brain drain**

Although the healthcare industry is a service industry, it is far more complex when compared to any other service sector. Hence, this Summit is intended to address the pressing challenges within the industry, while providing a platform for healthcare professionals and thought leaders to network, share insights, exchange best practices and listen to the leading experts in realizing "Universal Health Coverage" and making India the " Vishwa Guru" by the year 2047.

OBJECTIVE

This Leadership Summit aims to bring industry leaders, not only from the Healthcare sector, but also from other key sectors as well together, to share insights, collaborate on solutions to improve healthcare outcomes and inculcate leadership attributes among emerging future leaders, to improve the overall healthcare delivery system in the country, for the wellbeing of the entire community at large.
